 USD50,000 / equivalent approved currency lump sum

'TX' Acc GBP

ISIN: LU2549545437 **Bloomberg:** GLBLSUS LX
CUSIP: L6771A827 **Sedol:** BNNSZV7

Please note, not all share classes are authorised for public sale in every country.

Objectives and investment policy summary

The Fund aims to achieve total returns comprised of capital growth and income over at least 5-year periods, before allowing for fees.

The Fund invests primarily (at least two-thirds) in the shares of companies around the world and in related securities (which includes, without being exhaustive, depositary receipts and equity linked notes).

The Fund promotes environmental and/or social characteristics by investing in companies considered by the Investment Manager as having operations and/or business models that aim to minimise their harmful effects on society and the environment, or whose products and/or services seek to benefit society and the environment.

Annualised performance (%)

	Fund	Benchmark	Sector
1 year	-0.9	4.9	1.7
3 years	n/a	n/a	n/a
5 years	n/a	n/a	n/a
Since launch	4.7	9.9	6.5

Fund statistics (%)

SINCE LAUNCH	DATE*
Highest annualised return	15.5 31.03.24
Lowest annualised return	13.6 29.02.24
*12 month rolling performance figures	
Annualised volatility (%)	13.7
Maximum drawdown (%)	-9.2

Cumulative Performance

Performance data source: © Morningstar, dates to 31.03.25, NAV based, (net of fees, excluding initial charges), total return, in sterling. The Fund is actively managed, any index shown is for illustrative purposes only. This means that for an investment of £1,000, £1000 would actually be invested in the Fund. Performance prior to 03 February 2023 is based on a longer existing share class, adjusted to match the fees of this share class.

Income distributions (cents per class unit)

An accumulation share will not make income payments to shareholders but will instead accrue the income daily in the net asset value of the share class.

[§]This Fund is classified under Article 8 of the EU Sustainable Finance Disclosure Regulation. Article 8 applies to products which promote environmental or social characteristics alongside their financial-only investment objectives. For further information, please see www.ninetyone.com/SFDR-explained

^{§§}Funds that seek out investments in sustainable leaders through a positive inclusion approach e.g. best-in-class, impact. For further information, please see www.ninetyone.com/ESG-explained

The portfolio may change significantly over a short period of time. This is not a buy or sell recommendation for any particular security. Figures may not always sum to 100 due to rounding.

General risks

The value of these investments, and any income generated from them, will be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which they invest.

Past performance does not predict future returns; losses may be made. Ongoing costs and charges will impact returns.

For Inc-2 and Inc-3 shares classes, expenses are charged to the capital account rather than to income, so capital will be reduced. This could constrain future capital and income growth. Income may be taxable.

The Fund's objectives will not necessarily be achieved and there is no guarantee that these investments will make profits; losses may be made.

Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of investments.

This Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Specific fund risks

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may result in wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Sustainable Strategies: Sustainable, impact or other sustainability-focused portfolios consider specific factors related to their strategies in assessing and selecting investments. As a result, they will exclude certain industries and companies that do not meet their criteria. This may result in their portfolios being substantially different from broader benchmarks or investment universes, which could in turn result in relative investment performance deviating significantly from the performance of the broader market.

Important information

All data as at 31.03.25. The most up to date fund details (e.g. name, overview, key facts etc) are reflected as at the date of publication. Any changes effective after publication will appear in the next update. This is a marketing communication. It is not to be distributed to retail customers who are resident in countries where the Fund is not registered for sale or in any other circumstances where its distribution is not authorised or is unlawful. Please visit www.ninetyone.com/registrations to check registration by country.

For further information on our sustainability-related funds, please visit the sustainability-related disclosures section within the literature library at www.ninetyone.com. This product is out of scope of the UK Sustainability Disclosure Requirements.

A rating is not a recommendation to buy, sell or hold a fund.

The Fund is a sub-fund of the Ninety One Global Strategy Fund, which is a UCITS authorised by the CSSF and organised as a Société d'Investissement à Capital Variable under the law of Luxembourg. Ninety One Luxembourg S.A. (registered in Luxembourg No. B 162485 and regulated by the Commission de Surveillance du Secteur Financier) is the Manager of the Fund. This communication is not an invitation to make an investment nor does it constitute an offer for sale. Please refer to the Prospectus of the UCITS and to the Key Information Documents (KID) or Key Investor Information Documents (KIID), where relevant, before making any final investment decisions.

Fund prices and English language copies of the Prospectus, annual and semi-annual Report & Accounts, Articles of Incorporation and where relevant, local language copies of the KID and KIID may be obtained from www.ninetyone.com. A summary of investor rights can be found in the Prospectus, and details of Ninety One's complaints handling procedures are available in English on www.ninetyone.com/complaints. Ninety One Luxembourg reserves the right to discontinue the marketing of its Funds in countries where they are registered.

In Switzerland, this information is available free of charge from the Swiss Representative and Paying Agent, CACEIS Investor Services Bank S.A., Esch-sur-Alzette, Bliecherweg 7, CH-8027 Zurich, Switzerland. In Spain, the Ninety One Global Strategy Fund is registered with the Comisión Nacional de Mercados y Valores as a foreign collective investment scheme marketed in Spain, with the number 734.

In the US, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended). No shares may be offered or sold in the US to any US person. The fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended (1933 Act).

In Australia, this communication is provided for general information only to wholesale clients (as defined in the Corporations Act 2001).

Glossary summary

Alpha: A measure which describes whether an actively managed portfolio has added value in relation to the amount of risk taken relative to the benchmark. Alpha can be positive or negative.

Benchmark: A standard to represent the wider market, such as an index, more than one index or a market average, that can be used to measure a fund's performance or risk.

Beta: A measure of the volatility of a fund relative to its benchmark, i.e. how sensitive the fund is to movements in the market. A figure greater than 1 indicates that the fund will tend to outperform in a rising market and under perform in a falling one, i.e. is more volatile than the market. The reverse applies to a Beta of less than 1.

Credit rating: A score awarded by an independent rating agency to indicate the financial strength of the issuer of a bond, and the potential for a default on interest and principal payments. The top credit rating is 'AAA'. The lowest rating to be considered 'investment grade' is 'BBB'. Below 'BBB', bonds are termed 'sub investment grade' or 'high yield'. Average credit ratings are based on the individual bond ratings issued by the ratings agencies. For each bond, the ratings issued by each agency are combined to form a single rating based on the methodology that most closely matches the benchmark, otherwise median is typically used where there is no benchmark. The portfolio rating is the weighted average of the above bond ratings.

Share class distribution types

Accumulation (Acc): An accumulation share will not make income payments to shareholders but will instead accrue the income daily in the net asset value of the share class.

Income (Inc): An income share will distribute all or part of the income accruing in that share class.

Income-2 (Inc-2): These distribute the income accruing in the share class and charge all their expenses to capital. This maximises the income available for distribution – although it also reduces capital by an equivalent extent which could constrain future capital and income growth. This can be inefficient from a tax perspective in those countries where income tax rates are higher than those on capital gains.

Duration: Expressed in years, this measures how much a bond's price will rise or fall when interest rates change. The longer the duration, the more sensitive it is. The higher the duration, the greater the potential return (and the greater the risk).

GSF: Ninety One Global Strategy Fund.

Information ratio: A measure of a portfolio manager's skill against a benchmark. The over or underperformance of the fund relative to its benchmark is divided by the tracking error. In this way, we arrive at the value, per unit of extra risk assumed, that the manager's decisions have added to what the market would have delivered anyway. The higher the Information ratio the better.

KID SRI: The Summary Risk Indicator (SRI) appears in the Key Information Document (KID) and it is a guide to the level of risk of this product compared to other products. It shows how likely the product will lose money because of movements in the markets. A rating of 1 represents a low level of potential losses from future performance and a rating of 7 represents a high level of potential losses from future performance. UK-domiciled investors should refer to the risk indicator contained in the relevant Key Investor Information Document (KIID).

Maturity profile: The average life of each bond in a fund's portfolio, weighted by value.

Morningstar 'star' ratings: The overall rating for a fund, often called the 'star rating', is a third party rating derived from a quantitative methodology that rates funds based on an enhanced Morningstar™ Risk-Adjusted Return measure. 'Star ratings' run from 1 star (lowest) to 5 stars (highest) and are reviewed at the end of every calendar month. The various funds are ranked by their Morningstar™ Risk-Adjusted Return scores and relevant stars are assigned. It is important to note that

individual shareclasses of each fund are evaluated separately and their ratings may differ depending on the launch date, fees and expenses relevant to the share class. In order to achieve a rating the share class of a fund must have a minimum three-year performance track record. For a further explanation, please visit

<https://www.morningstar.com/company/morningstar-ratings-faq>

Ongoing charge: The ongoing charge figure is the charge you'll pay over a year for as long as you hold your investment in a fund. It relates to the costs of running the fund (including the annual management fee).

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Sector: A peer group of funds managed to a similar investment policy. Not every fund will have a relevant sector.

Tracking error: A measure of how much a fund's returns deviate from those of its benchmark. The lower the number the closer the fund's historic performance has followed that of its benchmark.

Volatility: The pace or amount of change in value of an aspect such as an investment, an asset class or a fund.

YTD: Year to date.
